ANNOUNCEMENT

We are very pleased to announce that Enrico Stradiotto, P. Eng. has accepted the position of Technical Resources Engineer with the Ontario Concrete Pipe Association. Enrico will join OCPA on March 2nd, 2009.

Enrico brings a wealth of experience to OCPA. He has almost fourteen years experience in the concrete pipe and precast industry with Con Cast Pipe. During his time with Con Cast Pipe he has held the positions of Sales Representative, Technical Sales Manager and Engineering Manager. He is a registered Professional Engineer in the province of Ontario and has a Bachelor of Applied Science in Civil Engineering degree from the University of Waterloo. Enrico has been very active with both the Technical and Marketing Committees of OCPA.

The positions of Technical Resources Engineers were created at OCPA to favourably position reinforced concrete pipe and precast products in specifications and standards across Ontario. This is accomplished through ongoing interaction with consulting engineers, municipalities, government departments and agencies that maintain and develop standards such as Ontario Provincial Standards. OCPA Technical Resources Engineers regularly conduct seminars and Lunch and Learn presentations to engineers and inspectors throughout Ontario. Technical Resources Engineers are also charged with the responsibility of educating civil engineering students at universities and colleges in Ontario on the design, proper installation and testing of concrete pipe and precast products.

Enrico joins Paul Imm, P.Eng. as Ontario Concrete Pipe Association's second Technical Resources Engineer. With the addition of Enrico we have three Professional Engineers at OCPA with combined gravity pipe industry and precast concrete industry experience totaling over fifty years. We are confident that we now have the resources to address the many challenges facing our industry.

Please join me in congratulating Enrico on his new position and wishing him well at Ontario Concrete Pipe Association.

Gerry Mulhern, P.Eng.
Executive Director
Ontario Concrete Pipe Association
